

## BIRDS IN THE SAGINAW BAY AREA

**August 1<sup>st</sup>, 2017 thru November 30<sup>th</sup>, 2017**

**Compiler:** Joe Soehnel, Hampton Twp, MI 48732 – (saginawbaybirding@gmail.com)

**Weather:** August's average high and average for the month were both slightly below normal while precipitation was just over one inch below normal for the month. September, on the other hand, felt more like August weather, as the average high was 5.8 degrees above normal. There was a remarkable six-day stretch from Sep 21-26 where temps soared above 90F, setting daytime high records on each of those six days. Precipitation was nearly non-existent for September with a mere .44 inches for the month compared to a normal 3.83". Twenty-two of the thirty days recorded a trace of rain or none at all.

October kept a similar pace with September by recording both average high and low temps six degrees above normal. October's precipitation made up for September's sparse amount by recording 4.45", far above the monthly average of 2.63". October 23<sup>rd</sup> recorded 1.9" to bolster October's precipitation. November average daytime temp was one degree below normal. Precipitation was slightly below the monthly average at 2.05" with Nov 15 & 18 recording 1.35".

**Summary:** Birders had good SBA coverage (except Arenac County) and observed an SBA record tying 253 bird species, matching 2007's total. Good birds were sprinkled around the SBA that included the following standouts: **King Eider** (11/22-29) @ AuSable River Mouth; **White-faced Ibis** (10/09) @ Crow Island SGA; **Whimbrel** (08/06) @ Bay City SRA; **Ruff** (10/04-06) @ Fish Point; **Black-legged Kittiwake** (10/31) @ Grindstone City; two **Red Crossbill** records in Oil City area (11/03) & Unionville area (11/27); **Lark Sparrow** @ Tawas Point (08/31-09/04), and two **LeConte's Sparrow** records from Verona SGA (09/28) & Tawas Point (10/10). There were an impressive 32 waterfowl species, 25 shorebird species, 17 sparrow species, and 32 wood warbler species that added to this fall's record tying number.

Also of note were no less than two **Rufous Hummingbirds** in the SBA and observed within two days of one another. A female/immature type was reported by a Juniata Twp homeowner and identified by ATC on 11/02. A handsome male was reported by a Larkin Twp., MI homeowner and was observed by JMS on 11/04. Despite efforts to encourage both homeowners to share these rare Michigan birds, neither was willing to have them be made known to the public.

**New Peak Counts:** **795** Gadwall on 10/25 at Shiawassee NWR – RAE & JMS  
**700** Bufflehead on 11/01 at Tawas Point – JB  
**5000** Double-crested Cormorant on 09/05 at Tawas Point – PO & BB  
**500** Barn Swallows on 08/24 at Fish Point – ATC  
**1375** Pine Siskins on 10/19 at Tawas Point – PO  
**188+** White-crowned Sparrows at Tawas Point – JB  
**1696+** Rusty Blackbirds on 10/10 at Tawas Point – JB  
**7** Northern Parula on 09/14 at Tawas Point - RAE

**New Fall Peak Counts:** **1209** Northern Pintail on 10/25 at Shiawassee NWR – RAE & JMS  
**1400+** Common Goldeneye on 11/01 at Tawas Point – JB  
**68** Common Gallinule on 09/08 at Shiawassee NWR – RAE

**New Fall Early Date:** **1** Snow Goose on 08/31 at Tawas Point – PO

A sampling of photos submitted to [www.saginawbaybirding](http://www.saginawbaybirding.org) for the fall period.

King Eider (female) – Gary Nelkie  
AuSable River Mouth, Io – 11/23/2017

Great Egrets – Roger Eriksson  
Tuttle Marsh, Io – 09/03/2017

Plegadis Sp. – Joe Soehnel  
Crow Island SGA, Sa – 10/08/2017  
(ID'd as White-faced Ibis by Karl Overman on 10/09)

Rufous Hummingbird – Allen Chartier  
Juniata Twp, Tu – 10/26/2017

LeConte's Sparrow – Bob Bell  
Tawas Point, Io – 10/10/2017

Kirtland's Warbler – Sam Burckhardt  
Kobs Rd, Io – 09/10/2017

***This report, as well as previous seasonal reports from 1986-2016, can be found at <http://www.saginawbaybirding.org>, along with updates on winter 2017-2018 birds in the Saginaw Bay Area, as reported to Joe Soehnel at [saginawbaybirding@gmail.com](mailto:saginawbaybirding@gmail.com).***

<b>TOTAL: 253 Species (+7 Other Taxa)</b>				

\*Michigan Review List Species. Inclusion of records for these species in this report does not signify that they have been verified, only that an encounter was reported. The observation will not be considered an official SBA record until it has been reviewed and accepted by the Michigan Bird Records Committee (MBRC).

Peak counts and early/late dates are designated such based upon records established in the publication *Birds and Bird Finding in the Saginaw Bay Area* by Ron Weeks, published in 1995, and subsequent updates to the data by the compilers of the Birds in the Saginaw Bay Area report. Comments on seasonal occurrences also relate to information found in this book, as well as species notations on the Michigan Bird Survey Form.
