

Birds in the Saginaw Bay Area

March 1st, 2016 thru May 31st, 2016

Compiled by: David J. Peters
U.S. Fish & Wildlife Service

Saginaw, MI 48601
birdsinthesba@gmail.com

Summary: Winter ignored the calendar as March began, issuing a major snow event on the first full night of March. Another decent snow occurred later in the month, along with some rain, but from mid-April on there was no more snowfall, and indeed, lower than average rainfall. March temperatures were milder than average, but April and May were near average.

A total of 262 species from the Michigan Bird List were reported in the Saginaw Bay Area this spring, the third highest total since the Birds in the SBA compilation was initiated. This report lists each of these species, along with the highest reported individual count(s) for each, and a list of the SBA counties in which each was noted. First dates are listed for species not recorded in the preceding February, and last dates for (most of) the species that don't remain into the summer. An impressive number of six new SBA all-time peak counts were established. Equally impressive were the six new spring high counts. There was one new record spring early date, and one new record spring late date. One first time ever in the SBA record was reported, as were first time records for Arenac County, Saginaw, and Tuscola Counties. Rounding out the list of notables is the seven Michigan Review List species were reported.

Fish Point State Wildlife Area in Tuscola County, and Tawas Point State Park in Iosco County played a significant role in SBA birdlife this spring, accounting for many of the before mentioned records.

This report, as well as previous seasonal reports from 2000-2015, can be found at <http://www.saginawbaybirding.org>, along with updates on summer 2016 birds in the Saginaw Bay Area, as reported to Joe Soehnel at saginawbaybirding@gmail.com.

Many thanks to all observers who contributed their sightings directly to this compilation. Your extra efforts result in a significantly more accurate and thorough report. Additional thanks to Joe Soehnel for his ongoing support.

Species	Number	Date	Location	Observers / Comment

PIPING PLOVER:	2	4/30	TPSP, lo	RAE - first date
KILLDEER:	1 33	3/3 5/26	Dow Ponds, Mi FPSWA, Tu	JMS - first date JMS - also noted in Ar,Ba,Hu,lo,Sa

*BLACK-NECKED STILT:	1	4/25 - 5/16	FPSWA, Tu	TK,AK et al - 1st Tu record - pending MBRC acceptance
	1	5/17	SNWR, Sa	JMS - pending MBRC acceptance
SPOTTED SANDPIPER:	1	4/27	TPSP, lo	JB - first date
	20	5/25	TPSP, lo	DLJ - also noted in Ar,Ba,Mi,Sa,Tu
SOLITARY SANDPIPER:	1	4/26	FPSWA, Tu	MKE,JEV - first date
	4	5/17	SNWR, Sa	JMS - also noted in lo,Mi
GREATER YELLOWLEGS:	5	3/22	Birch Run Twp., Sa	AC - first date
	107	4/29	SNWR, Sa	JMS - also noted in Ba,lo,Tu
WILLET:	1	5/5	SNWR, Sa	DJP - first date - also noted in lo
LESSER YELLOWLEGS:	4	3/30	FPSWA, Tu	JPo - first date
	100	5/11	FPSWA, Tu	RMD - also noted in Ba,lo,Mi
WHIMBREL:	88	5/17	TPSP, lo	MHu,JHu,GSP,EMP - first date
	100	5/25	TPSP, lo	DLJ

A Whimbrel with white back and rump plumage was sighted at Tawas Point, lo on May 17, and Glenn Peterson captured this image. This pattern is found on both the nominate *phaeopus* race and the *alboaxillaris* race, but not the *hudsonicus* race that breeds in Canada and Alaska and passes through TPSP, lo in migration. Glenn wrote that images taken by others show the bird had white underwings, indicative of *phaeopus*.

HUDSONIAN GODWIT:	1	5/5	FPSWA, Tu	DD,MKE
MARbled GODWIT:	1	5/3 - 5/4	FPSWA, Tu	RR,JMS

*EURASIAN TREE SPARROW:	1	5/9 - 5/11	TPSP, lo	KO,JB,JMS,RAE,DLJ et al - 1st SBA record - pending MBRC acceptance

**The Saginaw Bay Area's first Eurasian Tree Sparrow was found at Tawas Point, Io on May 9.
Doug Jackson took this portrait of the bird on May 11.**

TOTAL: 262 Species

*Michigan Review List Species. Inclusion of records for these species in this report does not signify that they have been verified, only that an encounter was reported. The observation will not be considered an official SBA record until it has been reviewed and accepted by the Michigan Bird Records Committee (MBRC).

Peak/high counts and early/late dates are designated based upon records established in the publication *Birds and Bird Finding in the Saginaw Bay Area* by Ron Weeks, published in 1995, and subsequent updates to the data by the compilers of the Birds in the Saginaw Bay Area report. Comments on seasonal occurrences also relate to information found in this exhaustively researched book, as well as species notations on the Michigan Bird Survey Form.
