

# BIRDS IN THE SAGINAW BAY AREA

March 1-May 31, 1993

Compiled by: Ron Weeks

4111 Robinhood Terrace Midland, MI 48642 (517) 835-1939

Summary:

This spring was definitely cool and rainy. Fortunately some hot birds were found to keep the birder's interests. Heading the list was a Wilson's Plover, a first state record, found by Myles & Marilyn Willard in May 1st. The plover was present for nearly a week allowing many birders from around the state to add it to their state lists. Also outstanding was a report of a Brown Pelican in Saginaw. This bird was not refound. Other good birds included two Red-throated Loons from Arenac County, a Red-necked Grebe that spent the last half of May at Nayanquing, a pair of White Pelicans that spent a weekend there, a Snowy Egret from Port Crescent SP, Cattle Egrets in Midland and Bay City, another Barnacle Goose- this time from Shiawassee NWR, a Cinnamon/Blue-winged Teal hybrid at Crow Island, a Piping Plover and an early (5/1) Hudsonian Godwit from Nayanquing, the usual Little Gull from Tawas, the everpresent Lesser Black-backed Gull from Bay City SP, a Longeared Owl from Crump (check your map), and Hooded Warblers from Bay City SP and Sebewaing.

Remarkably early returnees included: Great Egret (4/3), Merlin (3/20), Peregrine Falcon (3/21), and Gray-cheeked Thrush (4/19). More common were abnormally late migrants with large numbers of Oldsquaw still present into mid-May and large numbers of warblers present until the fourth week of May.

Impressive numbers included an amazing 3100 Oldsquaw and 67 White-winged Scoters present at Tawas Pt on 4/10, 2139 Oldsquaw and 36 White-wings still there on 4/22, 49 Red-shouldered Hawks, 227 Red-tails, 20 Rough-legs, and 5 Golden Eagles tallied on 4/18 at Port Crescent, 25 Eastern Phoebes, 800 Robins, and 250 Song Sparrows at Tawas on 4/9, and 12 Swainson's Thrushes, 20 Catbirds, 20 Chestnut-sided and 80 Bay-breasted Warblers at Bay City SP among a huge fallout of passerines.

Waterfowl were late in arriving and few in number this spring. Hawks numbers were up in general at Port Crescent (see appendix for full details), but Sharpies and Broad-wings were down. Shorebird habitat was scarce and almost none of the larger shorebirds made an appearance. Passerine migrants were noted in impressive numbers after a warm blast during the second week of May and again during the third week of May. Cuckoos, especially Black-billed were late and few.

Notably undetected residents were Least Bittern and Clay-colored Sparrow.

Both Bob ar	nd I came to same co	nclusion regarding these bird	is. Large numbers of	Oldsquaw along with
some White	e-winged Scoters stag	e in Lake Huron somewhere	north of Lawas Pt, Id	. In the early AM
(dawn to 9 d	or 10AM) they migrate	in various size strings sout	nward past the point.	i ney then develop
large rafts i	n the deep water just	south of Tawas Bay. These	ratts are not usually	visible from snore.
Only a few a	are found in the bay n	orth of the tip of the point.

## OMISSIONS/CORRECTIONS from previous reports

#### Winter 92-93

The 12/17 Yellow-rumped Warbler from Midland, Mi and January Robin from CNC, Mi should have been attributed to Myrtle Wilke as opposed to Myles Willard.

#### **APPENDIX:**

#### Huron Audubon Hawk Count - 1993 Totals

	<u>Range</u>	<u>Peak</u>	<u>Total</u>
Turkey Vulture	3/28-tp	4/18 (136)	1202
Osprey	4/10-5/16	4/24 (15)	53
Bald Eagle	4/16-5/30	5/15 (4)	15
Northern Harrier	3/28-5/8	5/7 (13)	54
Sharp-shinned Hawk	3/14-5/30	5/2 (178)	734
Cooper's Hawk	3/26-5/30	4/18 (3 3)	115
Northern Goshawk	4/23-5/2	5/2 ( <b>2</b> )	3
Red-shouldered Hawk	3/28-5/30	4/18 (4 9)	149
Broad-winged Hawk	4/16-5/30	5/2 (211)	873
Red-tailed Hawk	3/7-5/30	4/18 (227)	637
Rough-legged Hawk	3/7-5/22	4/18 (20)	6 1
Golden Eagle	4/18-5/9	4/18 (5)	8
American Kestrel	4/3-5/30	4/24 (33)	100
Merlin	3/20-5/15	4/24 (2)	6
Peregrine Falcon	3/21-5/30	5/15 (2)	5

The total raptor count was 4120 in 120.5 hours of watching. That total is corrected for same-day flight direction shifts. In other words, the birds counted on a given day were all headed in the same direction. This prevents double-counting of birds that are working the Thumb tip.

Bold face denotes count record high.
